

Under "Protect the Planet," one of the three main pillars of our sustainability strategy, Care for Next, our primary goals are to protect the environment, manage resources effectively and consciously, and reduce waste.

Therefore, in accordance with our Group's environmental purpose and context and in order to continuously improve our environmental management system throughout our entire value chain, reduce the environmental impacts of our activities, and increase Şişecam's environmental management performance, we undertake:

- to comply with the environmental legislation of the countries in which we operate, the obligations arising from these laws, and the requirements of customers, suppliers, and other third parties for whom compliance obligations are accepted by us, and to guarantee this compliance,
- to protect natural resources, use resources efficiently, increase recycling and recovery in line with the zero-waste approach,
- to fulfill our waste commitments in line with the Şişecam Group Waste and Circular Economy Policy,
- to take the necessary measures to reduce or eliminate the negative environmental impacts of our activities and to prevent environmental pollution,
- to assess the environmental impacts of our investments and manage our investments in an environmentally friendly manner,
- to cooperate with relevant parties in scope of the environmental management system in all our fields of activity,
- to benefit from energy-efficient and environmentally friendly technologies to reduce the effects of climate change while creating all processes starting from the design stage,
- to assess all environment-related risks and opportunities with a life cycle approach in all our activities, to take the necessary actions to achieve the goals and objectives for environmental improvements and to review them periodically,
- to monitor and continuously improve the environmental performance in all our areas of activity, and periodically report the progress,
- to increase awareness and sensitivity by ensuring that our policy is understood and adopted by our stakeholders and employees,
- to organize training programs to instill environmental awareness among our employees and increase their environmental responsibility.
