

2022 SUSTAINABILITY GOALS

preserve

- **5% of treated industrial wastewater reused.**
- At least 20% of recycled glass used for container glass production.
- **At least 10 furnaces use NOx reduction efforts by primary measures.**
- At least 4 industrial synergy program developed.
- **Forest land in mining site increased by 20%.**
- Biodiversity and conservation practices with local communities' engagement initiated and implemented in our operational regions.
- **Corporate procurement procedures mainstreamed with sustainability principles.**

empower

- **Zero target for occupational accidents (LTIFR).**
- Diversity and Inclusion Principles established.
- **Inclusive culture integrated in our operations and engagements**
- Diversity and Inclusion KPIs identified and in practice.
- **National and international policy on equal opportunities advocated.**

progress

- **Reduce GHG emission intensity of glass production by 5% from 2017 baseline.**
- Reduce specific energy intensity of glass production by 2% from 2017 baseline.
- **12 MW energy provided through renewable energy sources.**
- At least one additional plant implements reactant pre-heating methodology to reduce natural gas consumption.
- **Additional 2 plants implement Waste Heat Recovery system.**
